

<b>POSITION</b>	Graduate Geologist 2 - Mine Geology
<b>DEPARTMENT</b>	Geology – Mining Geology OP
<b>LEVEL</b>	1M / C2
<b>LOCATION</b>	Geita Gold Mine Tanzania
<b>EMPLOYMENT STATUS</b>	2 Years – Fixed Term

## OBJECTIVE OF THE ROLE

To support Mine geology Open Pit production activities by understanding the controls of mineralization, orebody style and dimensions for optimization of mineable ore block shape and mining technique to minimize dilution and ore loss.

## ROLE ACCOUNTABILITIES

- Ensuring that all geology work is undertaken in a safe, healthy, and environmentally friendly manner.
- Assist Mine Geologist in developing a full understanding of the geology, orebody, structural conditions, and controls on mineralization for each deposit.
- Assist Mine Geologist to produce a geological, structural, alteration, and mineralization map of a pit every bench or cross sections on mining faces.
- Ensure a high-quality control of sample collection is maintained from different sampling points.
- Assist Mine Geologist to communicate results and theories to Ore control Technician, Modelling and Evaluation Geologist and other stakeholders.
- Understand blast movement motoring techniques and ensure ore block demarcation is correctly done.
- Assist Mine Geologist to record ore material movement and ensure they end-up on correct destination.
- Assist Mine geologist to collect samples from faces and stockpiles for mapping and grade performance checks.
- Ensuring all grade control samples are collected from drilling site to geology dispatching without violating QAQC standards.
- Maintain proper communication between ROM pad ore controller, truck operators, Excavator Operators, and other stakeholders

## ROLE REQUIREMENTS

### Education & Qualification

- Bachelor's degree in Geology or Geoscience related field from a recognized Institution
- Valid Tanzanian Driving license class D or above

### Experience

- At least two (2) Year experience in OP or UG mining environment

### Knowledge & Skills

- Geological Mapping skills
- Computer Skills like MS Excel, MS word, PowerPoint
- Ore control management
- RC drilling supervision

## MODE OF APPLICATION

Please apply through our recruitment portal by following the link below. Please click the **link** or type the URL address on a website browser to access the application portal.

- On the portal you will be required to upload your detailed CV, copies of relevant certificates, e- mail and telephone contacts, names and addresses of three referees. Please do not attach certificates that are not related to the qualifications stated above.
- You will also be required to upload a cover / application letter addressed to “Senior Manager Human Resources”, Geita Gold Mining Ltd”. Subject should be “Graduate Geologist 2 - Mine Geology.”

## Our Values

**Application Link:** <https://careers.anglogoldashanti.com/job-invite/29426/>

- If you struggle to apply via the link provided, please head over to our website [www.anglogoldashanti.com/company/careers](http://www.anglogoldashanti.com/company/careers) for a step-by-step guide on how to apply for jobs on our recruitment portal (SuccessFactors).
- You will be required to present original certificates if you are contacted for interviews.
- Internal Applicants (those currently employed by AngloGold Ashanti) must have their application letter endorsed by their Head of Department (HOD) or Manager once Removed (MoR).

**APPLICATION DEADLINE:**

- Applications should reach the above on or before 20th April 2026 at 11:59 Pm.
- Only shortlisted candidates will be contacted for interviews.

<b>POSITION</b>	Graduate Geologist 2 - Exploration
<b>DEPARTMENT</b>	Geology - Exploration
<b>LEVEL</b>	1M / C2
<b>LOCATION</b>	Geita Gold Mine Tanzania
<b>EMPLOYMENT STATUS</b>	2 Years – Fixed Term
<b>POSITIONS</b>	Five (5)

**OBJECTIVE OF THE ROLE**

The purpose of the role is to implement daily exploration work programs by collecting, plotting and interpretation of geological data from various exploration projects as assigned by the immediate supervisor/manager. On daily basis the role holder will perform surface geological mapping, open pit and underground face mapping, drilling and logging as well as sampling and arrangement of sample sheets for submission to the laboratory. The role holder will supervise the work of the direct reporters and provide feedback of work progress and results on daily and weekly basis.

**ROLE ACCOUNTABILITIES**

- Ensure HSE compliance when conducting geology works and look after the implementation of work procedures, resource and PPE availability at workplace and smooth running of pre-start toolbox talks & safety meetings at workplace.
- Conduct geological mapping and sampling exercises as directed by the geologist in charge of the project while adhering to standard operating procedures.
- Implement exploration drilling programs as directed by the geologist in charge of the project and ensure compliance to work practices.
- Reconcile sample recoveries and qualities and ensure the drill cores are well oriented before commencing the marking exercise.
- Monitor and reconcile downhole surveys and immediately report any deviations from plan for timely decision making.
- Ensure the drill rig is well aligned according to the drilling parameters proposed on the drill plan.
- Ensure the RC samples are collected and labelled at on site and able to identify and rectify the errors generated during sampling according to sampling and QAQC protocols.
- Ensure all the samples are collected from drill sites and handed over to exploration core yard for further processing and submission to the lab.
- Monitor the work of the drilling supervisors and ensure all sampling consumables are available on drill rigs, accurately labelled and inspect the accuracy of the sample bags and sample sheets as per QAQC Sampling Protocol.
- Supervise the housekeeping at work sites and maintain good work practices as per requirements and guidelines of our Standard Operating procedures.
- Maintain good supervision and relationship with drilling contractors

**ROLE REQUIREMENTS**

**Education & Qualification**

- Bachelor’s degree in Geology or geoscience related field from a recognized Institution

**Experience**

- At least two (2) Years experience in Exploration & mining

**Knowledge & Skills**

- Geological Mapping skills
- Competence on computer-aided software’s such as GIS, Datamine or Leapfrog.

**Our Values**

- Supervision of exploration drilling programs

<b>POSITION</b>	Technician 2 - Survey
<b>DEPARTMENT</b>	Mining Technical Services
<b>LEVEL</b>	1M / C2
<b>LOCATION</b>	Geita Gold Mine Tanzania
<b>EMPLOYMENT STATUS</b>	2 Years – Fixed Term
<b>POSITIONS</b>	Two (2)

## OBJECTIVE OF THE ROLE

Receive and carry out job instructions from Survey Technician III and Mine Surveyors (occasionally) in supporting open pit mine operation activities. This level is characterized by competence in operating survey equipment and executing field work accurately, efficient and timely.

## ROLE ACCOUNTABILITIES

- Be proactive in all aspects of operational safety and encourage teamwork within the department
- Perform regular as-built surveys of the mined area for presentation of a daily dig plan and use by operations personnel in a timely manner.
- Perform pit surveys on a regular basis to enable accurate bench and total volumes to be calculated at the end of each month for mining cost calculations and payment to the mining contractor and for use in grade control reconciliation and mill throughput figure comparison.
- Perform stockpile surveys on a regular basis to enable accurate stockpile volumes to be calculated at the end of each month for reconciliation and ore stocks calculations.
- Perform set out of the pit and mining limits, batter pegs, temporary benchmarks (TBMs) to guide mining/excavation to the design.
- Perform staked-out of drill and blast collars patterns and survey of the charged holes prior to blast.
- Perform set out and survey of all grade control drill holes, ripline, phase sampling and exploration drill holes as required.
- Best operating practices, handling, keeping and maintaining surveying equipment and light vehicles (LVs)
- Survey of land parcels/farms (cadastral) during land evaluation and compensation exercise
- Perform surface drone surveys of the active or inactive mining areas when required. It also involves survey of the scene area in case of the incident or accident.
- Perform transfer of the set-out files to the survey control unit/controller for marking on the ground as well as transfer of the field raw data to the computer for further survey processes.
- Place a mark (with color spray paint) and hammer the pegs at marked points and write the design information on top of the pegs then tie up the color flagging tapes for the visibility and classification.
- Operate CALS to survey/scan old underground mine workings (voids) through a borehole to update the void model and plans for safe mining practices.
- Operate Quarryman laser scanner to capture points clouds data from inaccessible areas like undercut mine bench in the pit, stockpiles etc

## ROLE REQUIREMENTS

### Education & Qualification

- Diploma in Geomatics or Land Surveying

### Experience

- At least (5) years working experiences as Survey Technician in mining industry or engineering projects.

### Knowledge & Skills

### Our Values

- Competence in operating survey equipment
- Good communication skills
- Results oriented/driven
- Supervision skills
